

Date announced: October 7th 2020

Company description

Pathfinder Clean Energy (PACE) is a solar and clean energy developer and investor in various international markets. PACE is looking for additional technical/electrical support for the projects it is targeting across Poland, and this technical role may also support its international projects.

Role: Electrical/project lead - Poland. To support and take responsibility for communicating with the Polish grid operators to obtain cost and time competitive grid connections for PACE clean energy projects. To focus initially on utility scale solar connections and then take these projects through the development process to connection and operation.

Reporting to: PACE Poland and PACE Group

Terms: Contracted as a full/part time employee/consultant depending on the candidate.

Salary: Competitive. Based on the candidate's experience.

Responsibility:

Primary

- To assist PACE to identify and secure grid capacity for the development, connection and operation of clean energy projects in Poland at distribution and transmission.
- Interfacing with Polskie Sieci Elektroenergetyczne (PSE) and distribution operators such as Enea.
- Assisting with applications for obtaining zoning decisions for development
- To complete Due Diligence on potential project acquisitions or the establishment of joint ventures.

Secondary:

- To support PACE in the UK and other international markets on technical assistance for its clean energy projects.

Requirements:

- At least 3 years' experience as a project manager/engineer in power systems/electrical engineering/clean energy project development, construction and/or operation in Poland
